# KARAN PRATAP SINGH

Senior Analyst | Automation Test Engineer

Bangalore, India

+91 8103990097

karan-pratap.singh@capgemini.com

## PROFESSIONAL SUMMARY

Automation Test Engineer with 2+ years of experience in building and maintaining scalable automation frameworks using Selenium (Java) and Playwright (JavaScript/TypeScript). Strong expertise in UI and API automation, BDD practices, and CI/CD integration. Proven ability to improve regression efficiency, enhance test coverage, and deliver high-quality applications through structured testing and continuous improvement.

## PROFESSIONAL EXPERIENCE

**QA & Automation Engineer | Mercedes-Benz (MBRDI)**

**Project 1: Admin Panel Application | Onsite** **-June 2024 – February 2025**

Worked onsite on the Owner's Manual program, driving end-to-end testing and automating regression suites using Selenium (Java), improving test coverage and execution efficiency.

**Key Contributions:**

• Designed and automated 150+ test cases using Selenium + Java, improved regression coverage and reduced manual effort by ~40%
• Developed and maintained automation framework components for scalable regression testing
• Created and managed Requirement Traceability Matrix (RTM) ensuring complete requirement coverage
• Built Confluence dashboards and reports for test tracking and stakeholder visibility
• Supported CI/CD pipeline integration to improve release speed and quality

**Project 2: Basic Input Data Application | Onsite** **-February 2025 – March 2026**

Managed end-to-end testing for a newly developed application. collaborating with German team members across global environments (QA, PROD). Drove automation and validation across UI, API, and performance layers to ensure high-quality and reliable releases

**Key Contributions:**

• Automated 200+ test cases across regression, smoke, and sanity suites
• Performed end-to-end functional testing ensuring application stability across environments
• Executed API testing using Postman and REST Assured for backend validation

 Copyright © 2026 Capgemini. All rights reserved. 

• Conducted performance testing using k6 to validate system scalability under load
• Implemented AI-driven (Agentic AI) approaches to accelerate test case creation and automation scripting
• Ensured high-quality delivery across multiple releases

## TECHNICAL SKILLS

**UI Automation:** Selenium (Java), Playwright (JS/TS), TestNG/JUnit, Cucumber (BDD), Gherkin
**API Testing:** REST Assured, Postman, Playwright API Testing, REST APIs, SOAP API, GraphQL
**Performance Testing:** Grafana K6, Grafana Dashboard Report
**Mobile Testing:** Appium (Android & Hybrid Mobile Applications)
**CI/CD:** GitHub Actions, Azure DevOps Pipelines
**Project Tools:** Jira, Confluence, Azure DevOps
**Programming Languages:** Java, JavaScript/TypeScript, Python

## CERTIFICATIONS & TRAINING

• Selenium Automation Testing (Java) – Udemy (200 Hours)
• Playwright Automation (JavaScript/TypeScript) – 30 Hours
• API Automation Testing – REST Assured, Postman, TestNG, Cucumber (BDD)
• Hands-on experience with Jira, Confluence, and Azure DevOps

## EDUCATION

**Bachelor of Technology (B.Tech.) – Computer Science Engineering**
Jaypee University of Engineering and Technology, Guna — **CGPA: 7.8/10**
**Class XII – Sardar Patel School, Rewa (MP)** — **Percentage: 90%**
**Class X – Sardar Patel School, Rewa (MP)** — **Percentage: 95%**
